

Community Coordinator

The Community Coordinator will work closely with community members, researchers, and health system partners to support relationship-building, engagement, and communications that ensure Inuit voices and priorities guide all research activities.

- Coordinate community outreach and engagement activities across Nunavut
- Support knowledge sharing between communities, researchers, and health partners
- Assist with event planning, communications, and project coordination
- Promote ethical research grounded in Inuit Qaujimajatuqangit

- Experience working in or with Nunavut communities
- Strong communication, coordination, and organizational skills
- Passion for community wellbeing and Inuit self-determination in research
- Inuktitut language skills are a strong asset

Closing Date: Open until filled

Contract Services Opportunity: Data Specialist

This role involves working closely with researchers, communities, and health system partners to develop culturally relevant approaches to data stewardship, access, management, and analysis. The ideal candidate will have a strong background in data systems or analytics and a commitment to ethical, Inuit-led research practices.

- Support the development of Nunavut-specific data governance and access frameworks
- Assist with data collection, management, analysis, and visualization for SPOR-funded projects
- Liaise with partner organizations and ensure alignment with Inuit data sovereignty principles

- Experience working with health, population, or social data
- Proficiency with tools such as Excel, R, Python, or other analytics platforms
- Familiarity with Inuit contexts and public health research in northern Canada
- Strong organizational and communication skills

Location: Remote or Iqaluit-based

Inquiries can be directed to nuspor@ghrc.ca
